Education

Stony Brook University — Stony Brook, NY
Ph.D. in Applied Mathematics and Statistics — *Aug 2022 - May 2026*
M.S. in Applied Mathematics and Statistics — *Aug 2020 - May 2022*
Advanced Graduate Certificates in Data Science and Operations Research — GPA: 3.950/4.000

The Ohio State University — Columbus, OH
B.S. in Mathematics (Theoretical Track) — *Aug 2017 - May 2020*
Minors in Computer Information Science and Economics — GPA: 3.672/4.000

Research Experience

Department of Applied Mathematics and Statistics, Stony Brook University — Stony Brook, NY
Reinforcement Learning for Enhanced Tic-Tac-Toe and Behavioral Science Applications — *August 2022 - Present*

- Enhancing traditional strategies for 5×5 tic-tac-toe by developing and implementing reinforcement learning algorithms, including stochastic-gradient Monte Carlo and other approximate solutions.
- Investigating human decision-making in game scenarios, with an emphasis on cognitive processes and risk assessment, merging cognitive behavioral science and tic-tac-toe strategy.
- Collaborating closely with advisors to produce a research paper, with the aim of academic publication in top-tier journals.

Teaching Experience

Department of Applied Mathematics and Statistics, Stony Brook University — Stony Brook, NY
Instructor - Statistical Laboratory (Fall 2022, 2023) and Mathematical Statistics (Spring 2023) — *August 2022 - Present*

- Designed and delivered engaging lectures on statistics, intermediate data analysis, and statistical inference.
- Developed course materials, assignments, and assessments for an average class size of 52 students.
- Guided students in hands-on R programming for improved learning outcomes.
- Offered personalized support through office hours, resulting in enhanced student understanding and performance.
- Received consistent positive feedback through course evaluations from students for effective teaching methods and ability to explain complex statistical concepts in an understandable manner.

Skills

Programming Languages: R, Python, SAS, SQL, Stata
Statistical Software: RStudio (R Markdown, R Sweave), Visual Studio, Jupyter Notebook, SAS
Machine Learning and Data Analysis: Reinforcement Learning (e.g., Dynamic Programming, Monte Carlo Methods, Temporal-Difference Learning Methods), Data preprocessing and cleaning, Exploratory data analysis, Feature engineering, Data Visualization

Academic Projects

Department of Computer Science, Stony Brook University — Stony Brook, NY
Data Science - Understanding Flight Delays — *August 2021 - December 2021*

- Retrieved relevant flight arrival performance datasets from the Bureau of Transportation Statistics.
- Preprocessed datasets by subsetting, imputing missing data, merging, and encoding variables.
- Gained insights through descriptive statistics, significance testing, and data visualization for model building.
- Implemented machine learning models for flight delay prediction and compared their effectiveness.
- Presented research in a reproducible and well-documented notebook with an academic report.

Department of Applied Mathematics and Statistics, Stony Brook University — Stony Brook, NY
R Package - Statistical Methods for Partially Matched Samples — *Mar 2021 - May 2021*

- Developed an R package for statistical analysis of partially matched samples, combining independent samples and matched pairs designs.
- Implemented specialized procedures for hypothesis testing, parameter estimation, and more.
- Designed user-friendly interfaces, ensuring accessibility for researchers.
- Collaborated to validate statistical procedures, resulting in a reliable tool.
